

Product update

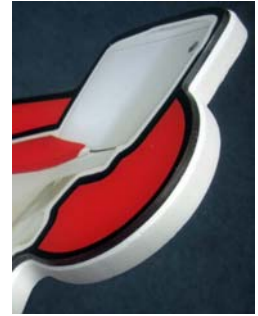

Why choose **find**® dementia signs?

April 2010

Key features:

- ① Water and chemical resistant
- ① 12mm thick rigid laminated construction
- ① Integrated, secure fixing
- ① Secure, interchangeable name and picture section
- ① Anti-fungal and anti-bacterial properties.
- ① Non-reflective surface
- ① Smooth, safe edges
- ① Tactile and durable

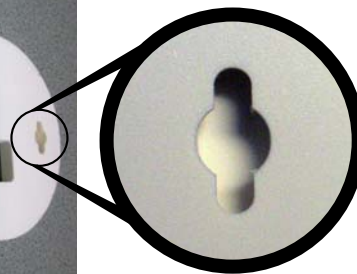

"I had no idea it would be like this!"

.... is a typical comment someone has when they get a **find**® sign in their hands for the first time.

Keyhole fixings to rear

Rear of a bedroom sign showing interchangeable sections & keyhole fixings

It is agreed that an insubstantial sign that can be easily damaged or removed can be more detrimental than no sign at all.

find® signs are fit for purpose.

They may cost a little more but anything else is false economy. Your budget is precious so don't buy something which can be peeled off or needs to be replaced after a short time. Invest in the only product that's been designed by research, approved for training and built to last.

In Care Homes catering for people with dementia, signs fixed at the correct height will invite a lot of touching and picking - **find**® signs are specifically designed to cope with this daily 'wear and tear'.
